

Shri Vaishnav Vidyapeeth Vishwavidyalaya Indore
Shri Vaishnav Institute of Paramedical Sciences
BACHELOR IN MEDICAL LABORATORY TECHNOLOGY (BMLT)
Syllabus BMLT II SEMESTER
Session 2023-2024

Subject Code	Category	Subject Name	Teaching and Evaluation Scheme								
			Theory			Practical		L	T	P	CREDITS
			End Sem University Exam (60%)	Two Term Exam (20%)	Teacher Assessment (20%)	End Sem University Exam (60%)	Teacher Assessment (40%)				
BMLT201	CC	Basic Histology II (Anatomy & Physiology)	60	20	20	0	0	3	0	0	3

Legends: L - Lecture; T - Tutorial/Teacher Guided Student Activity; P - Practical; C - Credit;

*Teacher Assessment shall be based on the following components: Quiz/Assignment/ Project/Participation in class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs): The students will

- CEO1: rationalize the fundamental knowledge of the human body system.
- CEO2: understanding detailed functioning about human system histology.
- CEO3: gain knowledge about clinical conditions of different body systems.

Course Outcomes (COs): Student should be able to

- CO1: understand the human system with emphasis on normal and pathophysiological conditions.
- CO2: acquainted with the different body systems and their prime functions.
- CO3: Identification of the different clinical conditions with their signs and symptoms.
- CO4: Learn some important clinical identification processes of diseases.

Unit-I

Skeletal system, bones, joints, and muscles.:

- Classification and Functions of Bones. Gross structure of an adult long bone. Development and ossification of bone.
- Classification of bone joints: Fibrous, Cartilaginous and Synovial joints
- Muscles: Types and functions. E-C coupling. Changes during muscle contraction.

*Teacher Assessment shall be based on the following components: Quiz/Assignment/ Project/Participation in class, given that no component shall exceed more than 10 marks.

Unit-II

Nervous system II:

- Parts of nervous system. Structure of neurons. Action potential generation.
- Summary of cranial nerves.
- Autonomic nervous system: structure and functions,
- Spinal nerves.
- Special senses.

Unit-III

Urinary system II:

- Glomerular filtration. Determination of GFR.
- Urine formation with reference to Counter current mechanism.
- Nervous control in micturition process.
- Urinary tract infection, Chronic Kidney Disease, Acute Kidney Disease

*Teacher Assessment shall be based on the following components: Quiz/Assignment/ Project/Participation in class, given that no component shall exceed more than 10 marks.

Unit-IV

The Cardiovascular System II:

- Circulations: Systemic & Pulmonary. Regional circulations: Coronary and Carotid circulations
- Blood pressure: Types of blood pressure; determination of blood pressure; Hypertension and Hypotension.
- Different cardiovascular diseases.
- Significances of ECG in different cardiac disorders.

Unit-V

Endocrine & Reproductive system II

- Secretion of Insulin. Diabetes Mellitus: Types and causes. Functions of Adrenal cortical hormones and their diseases.
- Parathyroid gland and its functions.
- Male reproduction: Spermatogenesis
- Female reproduction: Oogenesis, Menstruation, Ovulation, Implantation and Pregnancy.

Legends: L - Lecture; T - Tutorial/Teacher Guided Student Activity; P - Practical; C - Credit;

*Teacher Assessment shall be based on the following components: Quiz/Assignment/ Project/Participation in class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs): The students will

CEO1: identify various bones present in the human body.

CEO2: develop understanding about vitals of human cardiovascular system and factors affecting them.
systems.

CEO3: understand, analyze and interpret various histological tests for blood.

Course Outcomes (COs): Student should be able to

CO1: understand and identify the human bones with emphasis on general anatomy and general histology.

CO2: distinguish various human bones based on their respective

CO3: memorize and perform various clinical tests.

CO4: analyze and interpret the results of various blood tests.

List of Practical's

- Bone identification according to their anatomy.
- Determination of different superficial and deep reflexes.
- Determination of Pulse. Different factors affecting pulse.
- Determination of Blood pressure. Different factors affecting Blood pressure.
- Differential count of WBCs.

*Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs): The students will -

CEO1: ingrain the understanding bioenergetics

CEO2: understand and comprehend the blood components, urine formation, endocrinology.

Course Outcomes (COs): Student should be able to -

CO1: develop profound knowledge about general biochemistry.

CO2: comprehend with principles bioenergetics.

CO3: acquainted with biomolecules metabolism.

CO4: acquainted with blood and components and related disorders.

CO5: understand urine formation, hormones and related disorders.

Unit I: Bioenergetics, Glycolysis, Kreb's cycle, oxidative phosphorylation, coupled reaction, group transfer.

Unit II: Metabolism of carbohydrates, lipids, Proteins, nucleotides

Unit III: Blood: Blood and circulation: Blood corpuscles, haemopoiesis, plasma function, blood volume, blood volume regulation, blood groups, Hemoglobin: Hemoglobin Production Disorders and Testing

Unit IV: Urine formation, urine concentration, waste elimination, micturition, regulation of water balance, electrolyte balance, acid & base.

Legends: L - Lecture; T - Tutorial/Teacher Guided Student Activity; P - Practical; C - Credit;

*Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in class, given that no component shall exceed more than 10 marks.

Course Education Objectives

- CEO1:** To explain the general properties and sterilization methods of microorganisms.
CEO2: To provide basic understanding of various contagious microorganisms.
CEO3: To understand the growth requirements and control of microorganisms.
CEO4: To understand pathogenic microorganisms and address the fundamental mechanisms of their pathogenicity.
CEO5: To understand the prevention and treatment of infectious microbes and their control measures.

Course Outcomes

- CO1:** Students will be able to understand general properties of microorganisms.
CO2: Students will be able to understand various types of contagious microorganisms.
CO3: Students will be able to demonstrate basic microbiology laboratory techniques, that will allow them to investigate the physiology and pathogenicity of microorganisms.
CO4: Students will learn about the core concepts of pathogenic microorganisms.
CO5: Students will be able to understand metabolism, prevention, diagnosis and treatment of pathogenic microbes.

Unit-I

Introduction to Microbial Sterilization Techniques & Culture Methods

Sterilization and Disinfection, Principles, and use of equipment of sterilization, namely Hot air oven, Autoclave and serum Inspissation, Pasteurization, Handling of waste, waste segregation and management including disposal. Biohazard. Aerobic and anaerobic culture methods.

Unit II

Parasitology

Introduction & classification of medically important parasites, Intestinal & Tissue protozoa (E.histolytica, Giardia Primary Amoebic meningoencephalitis) - Malaria parasite, Leishmanial parasites, Tapeworms, Flukes of liver and, Intestine, Intestinal nematodes, Filarial worms and other tissue nematodes.

Unit III

Human pathogenic bacteria and lab diagnosis

Definition of diseases: Epidemic, Endemic, Pandemic. Bacterial infections including, Tuberculosis, Diphtheria, Meningitis, Whooping cough, Pneumonia, Enteric fever, cholera, leprosy, syphilis, Urinary tractinfections, Gonorrhea etc.

Unit-IV

Human pathogenic Protozoa and lab diagnosis

Morphology, lifecycle, pathogenicity, clinical features, lab diagnosis, prophylaxis & treatment of Entamoebahistolytica, Entamoeba coli, Giardia lamblia, Trichomonas vaginalis, Plasmodium vivax, and Plasmodium falciparum; Difference between P. vivax, P. malariae, P. falciparum and P. ovale.

Unit V

Virology

Introduction to medical virology, Classification of infectious viruses, General characteristics of viruses, physical and biological properties of viruses. Storage of samples for viral diagnosis. Hepatitis viruses, Oncogenic viruses, HIV, SARS, Rotavirus.

*Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs): The students will-

CEO1: Interpret morphological changes of the disease in correlation to clinical manifestations, lab investigations and radiological findings of the disease

CEO2: Acquire the ability to identify and find appropriate solutions to medical problems

Course Outcomes (COs): Student should be able to -

CO1: develop competency in techniques of pathology branches like hematology, clinical pathology, blood bank, histopathology, and cytology.

CO2: acquire knowledge and understand the formation of blood cells, structure, functions, and methods of estimating different parameters.

CO3: understand the detailed aspects of inflammation and healing inflammation.

CO4: understand the principles of hemodynamic disorder.

CO5: acquire knowledge and understand Nutritional & Infectious Diseases in detail.

Unit-I

Introduction to histopathology:

- Different types of specimens in histopathology.
- Tissue specimen collection methods. FNAC.
- Common stains of histopathology laboratory and their compositions.

Unit II

Basic Hematological II:

- Various anticoagulants, their uses, mode of action and their merits and demerits.
- Determination of Hematocrit values by macro and micro methods and their merit and demerits.
- Morphology of normal blood cells and their identification.

Unit-III

Haematotological investigations –

- Physiological variations in Hb, PCV, TLC and platelet.
- Preparation and staining procedures of blood smears, study of morphology of blood cells.
- Preparation and staining procedure of Romanowsky dyes for the blood smears.

Unit-IV

Cytological analysis:

- Introduction to exfoliative cytology with special emphasis on female genital tract.
- Collection processing and staining of the Cytologic specimen.
- Different cytological staining processes.
