1ST YEAR / I Semester

ARCH 101: BASIC DESIGN & VISUAL ARTS

Syllabus: 15 weeks (8 hours/week) Total Teaching hours: 120 Hrs.

COURSE OBJECTIVES:

- To introduce the students to the fundamentals and principles of basic design to enable them, to comprehend Design as a creative process of choice making and statement of intent. to undertake design by application of basic design principles.
- Understanding the human body in space Activities and their relationship with spaces Scales and proportions
- To impart a good foundation in design through hands-on experience in designing simple two-dimensional and three-dimensional compositions.

COURSE OUTCOMES:

- At the end of the course, students will be able to:
 - Interpret visual literacy and visual expression; elements and principles of design
 - Develop the basic skills & abilities to design
 - Interpret basic vocabulary of design and architecture; Identify and map human activity in space
 - Infer, represent and communicate design ;
 - Construct representation and cognitive skills

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

- To impart an understanding of principles of composition, and appreciate design and elements. Exercises complement the lectures and ensure that the students learn to develop
- The Course prepares the ground for the students to gain an understanding of the fundamental issues in the design

FOCUS: Design Language

- Students will learn to explore human behaviour & activity through Space,
- The student will achieve the capacity of Experiencing Space in Time & Motion.
- The student will learn the basic vocabulary of design
- Students will learn the creation & organization of formal elements in works of art
 - Students will develop their basic skills & abilities of design expression.,
 - Students will learn visual literacy and visual expression, elements and principle of design, and the skill of rendering using a different medium. acquire the various skill to work with various material
 - Freehand: Memory left-brain creativity, Objects taking things apart/ reassembly

COURSE OVERVIEW

- The design provides the framework for understanding design as a new language by sensitizing students to the conceptual, visual, and perceptual issues involved in the design process. The design provides the framework for understanding design as a new language by sensitizing students to the conceptual, visual, and perceptual issues involved in the design process. and ways of representing it

COURSE CONTENTS:

SR. NO.	SYLLABUS: TOPIC	SUBTOPIC
	VISUAL ARTS	

TEACHING HOURS: 40hrs.

Understanding the design field through various exercises
Relationship of basic design to architectural design and design

- Ordering principles
- Spatial vocabulary
- Relation of basic design to architectural design

DESIGN

80hrs

Introduction to design and Architecture:
 Elements of Composition. (2D, 3D, 4D) Transformations in dimensions: Concepts of geometry: Form and Space:
 Mapping of Space(s). (Ideograms)
 Introductory to Anthropometrics & Ergonomics
 Exploration of design principles through case studies

4 Introductory exercises based on 'Learning by doing'

- To develop representation and communication skills through exercises involving drawing, sketching, graphic language, model-making, collage, etc.
- Undertake exercises to enhance creative thinking

40hrs

5 Introduction to the studio-based iterative design process

- To develop a small-scale design project for comprehension of design criteria involving the following:
- Understanding human activity and behaviour in space by activity mapping, anthropometric studies, etc.
- To make, explore, feel and mould space based on design ideas/principles Undertake hands-on work and creative thinking. Explore 'making' through various mediums and techniques of representation.
- Introduction to visualization and representation of an architectural environment's spatial qualities like spatial enclosure, depth, height, view, orientation, etc. and tectonic characteristics like surfaces, material, shape, texture, etc.

40hrs

SESSIONAL WORK:

DESIGN

- Minimum 6 tasks based on elements and principles of composition on sheets and/or models. Minimum one simple spatial design exercise such as seating area in public space, bus shelter, kiosks, play area, entrance gate, etc. demonstrating the application of the design principles and communicated effectively through two and three-dimensional hand-done drawings, sketches, and models.

VISUAL ARTS

- Minimum 6 tasks based on the composition of sheets and/or models. Minimum one simple spatial design exercise demonstrating the application of the design principles and communicated effectively through two and three-dimensional hand-done drawings, sketches, and models.
- This is a studio subject and students should be made to prepare drawings as studio exercises along with the theoretical inputs. The studio work should be supplemented with appropriate site visits.
- Sketching Techniques: Sketching as a tool to develop ideas, sketching as a tool to communicate ideas, Collages & Montages, Model Making I (Paper, Thermocol, Cardboards, Clay, Wood, Etc.)

GUIDELINES

The Tasks or Assignments /Problem is to be set from the entire syllabus
 The topic of the project is to be displayed on the Institute Notice Board fifteen days in advance OF the commencement of the classes

ARCH 103: BUILDING MATERIAL & CONSTRUCTION – I

Syllabus: 15 weeks (3 hours/week) Total Teaching hours: 45 Hrs.

COURSE OBJECTIVES:

To understand the elementary construction methods, explaining basic principles and considerations in the construction of buildings

COURSE OUTCOME

At the end of the course, students will be able to –

- Explain the properties of building construction materials and their use in building construction.
- Give an outline of building construction systems and the use of related building elements therein.
- Name building elements and basic building construction processes.

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

To understand the techniques of construction of a simple load-bearing structure with simple materials like brick, stone, etc. Knowledge required for specifying appropriate materials for various spaces in buildings

FOCUS: Building Materials and Load Bearing Const. Systems

- Students will get an understanding of materials of construction, basic principles of construction, and elements of buildings through theory, relevant drawing & experience.
- Students will get an understanding of materials and building systems in a broad overview.
- Students will learn vocabulary related to building elements and construction.

COURSE OVERVIEW:

This course is a combination of lecture & studio classes aimed at developing the student's understanding of material properties and construction techniques with hands-on construction yard assignments to introduce to the methods and techniques of construction of basic elements of a simple building and provide information on the properties, use, installation and costs of basic building materials.

- Basic materials of construction: natural and man-made
- Basic building elements and systems of building through case studies.
- Understanding of constructional behaviour of different elements of a construction system, about the properties of materials.
- Keywords, Terms & definitions.
- The concern with the appropriateness of materials to the context
- Load-bearing system

COURSE CONTENTS:

SR. NO.	SYLLABUS: TOPIC	SUBTOPIC	TEACHING HOURS:
		Introduction to basic elements of buildings and their importance: Structural concepts. Load bearing & non-load bearing walls; Construction details; Earthquake resistance; Types - walls, piers, footings, retaining structures;	
		<ul style="list-style-type: none"> • Introduction to different types of Masonry Brick Masonry: Brick: Brick bonds: walls, Garden wall bonding; • Stonemasonry: Stone: Rubble work; • Composite masonry: Cladding; • Openings: Lintels: Arches; • Ground and upper floors: Flooring Finishes: Flat roofs;

- | | | | | |
|---|---|----|--|---------|
| 1 | Introduction to Building Construction Materials | to | Introduction to building construction materials and their classification based on their properties: ceramic, metals, composites, polymers, and organic materials.
• Relationship of material properties to techniques and processes of working with materials. | 12 hrs. |
| 2 | Introduction to elements of Super Structure and Sub-Structure | | <ul style="list-style-type: none"> • Introduction to basic building elements and their role in a building: foundation, plinth, walls, opening, roof, floor, etc. • Introduction to building construction system and its elements e.g.: - Load Bearing, Framed and Composite structures. • Explanation through case studies, measure drawing, etc. | 16 hrs. |
| 3 | Introduction to masonry structures | | <ul style="list-style-type: none"> • Understanding principles of Brick and Stone Masonry: • Composition of brick earth and their properties, manufacturing process of bricks, classification of bricks, test for bricks, a special type of bricks, substitutes for bricks, etc. • Bonds, principles, and applications in buildings. • Brick walls in the different bond end, corners and junctions. • Types of Masonry walls: load-bearing, partition, cavity, jali, Composite masonry, etc. • Introduction to Mud and Stone construction and techniques of building with mud and stone. • Demonstration of understanding by making models, drawings, hands-on work, etc. | 17hrs. |

NOTE:

- The classwork and home assignments should include appropriate site visits by the students.
- The student will maintain field observations/record books.
- At least two exercises are to be done in the construction yard.
- Each Unit should include a market survey and construction site to visit compulsorily with the studio working on sheets a minimum of 12 to 15 Nos A-1 Sheets

ARCH 104: ARCHITECTURAL GRAPHICS & DRAWING – I

Syllabus: 15 weeks (3 hours/week) Total Teaching hours: 45 Hrs.

COURSE OBJECTIVES:

- To introduce architectural drawing techniques and facilitate effective visual communication. The students will develop knowledge of orthographic projections, measured drawing, and skills in FreeHand sketching

COURSE OUTCOME: At the end of the course, students will be able to –

- Make use of Orthographic Projection Drawing as a representation tool & medium of effective visual communication.
- Appraise skills in visualization
- Maximize the potential of two-dimensional drawing as a tool for design development and representation.
- Students will learn to Scale drawing and conventional architectural representations in drawings and graphics.
- Students will develop the understanding & skills of technical drawing as a tool for visual communication.
- Students will learn the basic drafting and visualization skill

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED: Make use of Architectural Drawing as a representation tool & medium of effective visual communication.

FOCUS: Students will learn the basic drafting and visualization skill (manual)

COURSE OVERVIEW:

- The course introduces the fundamental techniques of architectural drawing and develops the appropriate skills for visualization and representation.

COURSE CONTENTS:

SR. NO.	SYLLABUS: TOPIC	SUBTOPIC	TEACHING HOURS:
1		Introduction; Drawing: <ul style="list-style-type: none"> Basic and analytical geometry – Geometric Constructions Geometrical Drawing: Description of Plane Curves Solid Geometry: Sections of solid Architectural Symbols: Orthographic Projections, Auxiliary Projection Development of surfaces Axonometric views, Isometric views, and other views. Measuring and Drawing to Scale: FreeHand Drawings: line strokes, light and shade techniques of simple, natural, and 3D geometric forms. Study of proportions and scale; structure and axes of objects; Outdoor sketching of simple building forms.

1	Geometrical Construction	<ul style="list-style-type: none"> Basic and analytical geometry – Geometric Constructions Geometrical Drawing: Architectural Symbols: Measuring and Drawing to Scale: Constructing and dividing lines and angles Constructing and dividing circles and arcs Constructing Regular Polygons Description of Plane Curves Architectural Symbols: 	8 hrs.
2	Orthographic Projection, Auxilliary Projection, and Isometric views	<ul style="list-style-type: none"> Orthographic projection and auxilliary projection Axonometric views, isometric views, and other views. Projections of Points, Lines, and Planes Projections of solids (Prisms & Pyramids) Tilted Objects Sections of Solids Interpenetrations of Solids (Basic). Description of Plane Curves Solid Geometry: Sections of solid 	21 hrs.
3	Development of Surfaces	<ul style="list-style-type: none"> Introduction of D.O.S Regular Polygons and Platonic Solids D.O.S of hip roof & Gable roofs D.O.S of sectioned objects 	8 hrs.
4	Allied Techniques (Part 1 of 2)	<ul style="list-style-type: none"> Visualization Software (Sketch-UP, Rhino, or equivalents) Model Making Various freehand sketching exercises to strengthen visualization and representation. FreeHand Drawings: line strokes, light and shade techniques of simple, natural, and 3D geometric forms. Study of proportions and scale; structure and axes of objects; Outdoor sketching of simple building forms. 	8 hrs.

GUIDELINES

Assignments /Tasks are to be set from the entire syllabus; The topic of the project is to be displayed on Institute Notice Board fifteen days - a week time in advance OF commencement of the classes

NOTE:

This is a studio subject and students should be made to prepare drawings as studio exercises along with the theoretical inputs. The studio work should be around 12 to 15 A1 sheets for appropriate site visits.

Evaluation is to be done through viva voce by an external examiner appointed by the university at Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva-voice

ARCH 105: HISTORY OF ARCHITECTURE & CULTURE- I

Syllabus: 15 weeks (2 hours/week) Total Teaching hours: 30 Hrs.

COURSE OBJECTIVES:

To explain to the students the evolution of architecture over time with special emphasis on social, religious, and environmental factors. To make the students understand the developments in construction technology in different periods.

COURSE OUTCOME:

At the end of the course, students will be able to –

- Outline the prehistory and timeline of human evolution
- Discover various cultural expressions
- Compare Indian history and its cultural values
- Develop an understanding of the relationship between people and place

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

Acquire knowledge to identify the common characteristics among the monuments of a particular style and good practices of architecture in the past

Acquire graphic skills to present a building, analyze its elements and explain the composition.

FOCUS: Humanities

The student will learn an appreciation of various cultural expressions through instruction and experience

The students will develop an appreciation of the rigorous thought processes in the field of science

COURSE OVERVIEW:

History of Architecture to be studied as the development of building forms in response to social, religious, aesthetic, and environmental factors. It focuses on the three-dimensional forms plan forms, façade organization, structural solution, construction methods, and ornamentation as well as focuses on the general trends and not on specific e.g. of buildings.

COURSE CONTENTS:

SR. NO. SYLLABUS: TOPIC SUBTOPIC

TEACHING HOURS:

Detailed study & analysis of architectural design fundamentals through significant e.g., in the light of the following for the periods mentioned in the modules. Genesis of seed ideas & concepts; Timeline; Socio-political background, key people involved; Climatic & geographic influence; General settlement pattern; Cities & its civic places; Construction technology & material; Design principles; Typology; Evolution; Spatial organization; Form & Detailing. The e.g., to represent the following historical styles are suggestive & students are encouraged to explore additional e.g., for a comprehensive understanding of the respective styles

- Understanding art as an expression of culture.
- Exposition of aspects of literature, performing arts - theatre, dance, music and plastic arts; painting, sculpture, film, in terms of basic characteristics and development of each field and first-hand experience of some work

ARCH 107: THEORY OF STRUCTURES -I

Syllabus: 15 weeks (2 hours/week) Total Teaching hours: 30 Hrs.

COURSE OBJECTIVES:

- To enable students to understand the concepts of structures in architecture, use of different structural materials used for various buildings

COURSE OUTCOME:

- At the end of the course, students will be able to –
- Explain conceptual understanding of structural behaviour
 - Relate basic structural systems.
 - Apply technical vocabulary related to structural design

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

- the students shall be confident about the structural action of the various elements. Further, he will have sufficient knowledge about the various long-span structures.
- Students will get a conceptual understanding of structural behaviour to learn basic structural systems.

FOCUS: • The student will understand the technical vocabulary related to structure.

COURSE OVERVIEW:

To inculcate in

- the student has an awareness of basic structural principles used in various building systems
- Students will understand the structural behaviour of materials, basic structural systems
- Students will understand the loading mechanism of structural systems
- Basic principles of mechanics and behaviour of elements of structures.

COURSE CONTENTS:

SR. NO.	SYLLABUS: TOPIC	SUBTOPIC	TEACHING HOURS:
		Introduction: Structural Concepts: Force, the equilibrium of forces; a system of forces, resultant, equilibrant Parallelogram law, LOADS OF STRUCTURE: STRUCTURAL MATERIALS	
		<ul style="list-style-type: none"> Different methods of categorization of the structural system Mechanical properties of structural material Structural systems based on the mechanism of transfer of load 	
		<ul style="list-style-type: none"> Analysis of trusses, Problem of Span, Stress, Strain Tension And Compression Members Concepts of various structural systems – Cables – Trusses – Arches – Cable Roofs – Space Frames – Flat Slabs. Types of Beams, Cantilever: Types of loads Curved Structures and Long-Span Buildings 	
		Theory of Vaults and Domes – Construction of Masonry Vaults and Domes – Concepts of Reinforced Concrete Shells, Domes and Vaults – Folded Plate Roofs – tensile structures.	
		<ul style="list-style-type: none"> Definition of the centroid, a line of symmetry, the centroid for some standard shapes, calculation of centroid for shapes like L, T, C, I Sections, etc., a moment of inertia, Derivation of M.I formula for

				Rectangle, Circle, Triangle, calculation of M.I for L, T, C, I Sections, etc.,	
				<ul style="list-style-type: none"> Types of joints, lap joint & butt joint, failure of riveted joints, the strength of the joint, efficiency of joint, Unwin's formula, chain riveting & Diamond Riveting 	
1		Process of the building structure		<ul style="list-style-type: none"> Structure and Structural form Structure and its importance in Architecture 	6hrs
2		The broad categorization of structural system		<ul style="list-style-type: none"> Structural form - solid, Surface, skeleton, Membrane, hybrid Structural form - in Nature Structural form - man-made 	6hrs
3		States of stresses		<ul style="list-style-type: none"> Tensile, compressive, shear, torsion, bending 	6hrs
4		Basic requirements of a structure		<ul style="list-style-type: none"> Structural material: strength, stiffness, shape Equilibrium: Vertical, Horizontal, Rational settlement and earthquake behaviour 	6hrs
5		Types of loads & supports		<ul style="list-style-type: none"> Structural Elements: Strut, tie, beam, slab/plate, panel Structural Element behaviour: Tensile, compressive, shear, torsion, bending 	6hrs

NOTE:

This course is to be taught as an introduction with special reference to the structure in nature viz. Trees, the Human body, and other examples of which unusual rock formations are created by the forces of nature like wind and water.

- The teaching in this subject must bring out:
 - The predominant pictorial nature of the Architects language, The physical-mechanical essence of the subject matter.
 - The orientation of all Architectural efforts and their relation to form and space.

Emphasis should be laid on the understating of building evolution and form. The continuous evaluation shall be made of students' work based on various models, assignments, and sketches. More emphasis while teaching shall be laid on 'learning by doing' by students involving the making of 3-D models (to give the student different spatial experiences and make them understand the basics/principles involved).

ARCH 108: WORKSHOP -I

Syllabus: 15 weeks (2 hours/week) Total Teaching hours: 30 Hrs.

COURSE OBJECTIVES:

To introduce various fabrication skills and techniques necessary to produce scale- models, and encourage the preparation of models as an essential phase in design development and evaluation. Developing overall skills in understanding various tools, processes, and materials.

COURSE OUTCOME:

At the end of the course, students will be able to -• The student will learn different methods and techniques to represent an idea & thoughts

- The student will have various representation techniques at her disposal
- The student will be able to represent a design idea 3 dimensionally
- Use of presentation software

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

Dexterity; Knowledge of materials and their properties; craft skills; visualization skills;

FOCUS: Manual Skills

- The student will learn different methods and techniques to represent an idea & thoughts
- The student will have various representation techniques at her disposal
- The student will be able to represent a design idea 3 dimensionally
- Use of presentation software

COURSE OVERVIEW:

The course provides the foundation and capability to represent the concepts three-dimensionally. Sketching Techniques

COURSE CONTENTS:

SR. NO.	SYLLABUS: TOPIC	SUBTOPIC	TEACHING HOURS:
1	Sketching:	<ul style="list-style-type: none"> • Sketching as a tool to develop ideas, to communicate ideas 	4hrs
2	Craft:	Collages & Montages, Form Work	4 hrs.
3	Model Making	<ul style="list-style-type: none"> • Model Making (Paper, Pharmacol, Cardboards, Clay, Wood, Etc.) • Understanding various basic tools used for carpentry joinery and fabrication. • Understanding various building materials and their tools used for cutting, joining, and extension. Handling materials like wood, marble, steel, MS, plywood, POP, Aluminum, etc. • Understanding nailing, screwing, riveting and their various conditions and types of applications. • Expression of forms- By handling various materials. 	10 hrs.
4	Basic Use of Computers:	Presentation Software (MS Office, Prezi & Others)	4 hrs.

- 5 **Photography:** inbuilt models, using lighting and natural background 4 hrs.
- Vocabulary development /reinforcement • Introduction to Architectural Keywords • Meanings to Architectural Keywords 4 hrs.
- Making Sense of Architectural Keywords through the Masters' Works

SESSIONAL WORK:

ASSIGNMENTS:

- All the above modules will be evaluated in the form of verbal or written presentation of artwork, drawing work, model making, photography, etc. At least three major assignments involving the individual students to fabricate
- Scale model of a piece of furniture, Presentation of models, mock-up of an Everyday Object, Three-dimensional Forms, etc.
- Documentation of the important phases of fabrication is a must which shall become the basis for internal evaluation.

GUIDELINES

- Continuous Evaluation shall be made of students' work based on various models, sketches assignments, and market surveys.
- One Major And the rest minor tasks are to be set from the entire syllabus
- The topic of the project is to be displayed on the Institute Notice Board fifteen days in advance OF the commencement of the classes
- Evaluation is to be done through viva voice. Portfolios, after the university exam, shall be retained at the Institute level for the viva- voice.

ARCH 109: BUILDING SYSTEMS AND SERVICES -I SURVEYING & LEVELLING

Syllabus: 15 weeks (2 hours/week) Total Teaching hours: 30 Hr

COURSE OBJECTIVES:

To explain the techniques and instruments used in a survey of land tracts

COURSE OUTCOME:

At the end of the course, students will be able to –

- Interpret the concept, instruments, and methods of surveying and levelling
- Make use of concepts and methods of surveying and levelling
- Appraise the relevance of surveying and levelling with the Architectural field

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

Surveying skills and related theory.

At the end of the course, students will be able to –

- Interpret the concept, instruments, and methods of surveying and levelling
- Make use of concepts and methods of surveying and levelling
- Appraise the relevance of surveying and levelling with the Architectural field

COURSE OVERVIEW:

To explain the different techniques and instruments used in a survey of land tracts

COURSE CONTENTS:

SR. NO. SYLLABUS: TOPIC SUBTOPIC

TEACHING HOURS:

1	Introduction of surveying	<ul style="list-style-type: none"> • Introduction • Chain Surveying: errors and corrections, the composition of Areas. • Compass Surveying: • Plane Table Survey: • Levelling • Theodolite • Surveying and Architecture • Introduction to surveying: Definition, object, uses, classification of the survey, • Formulae are used in the measurement of land with geometrical and abstract configurations to work out Areas, volumes, and other quantities. • Principles of surveying, scales, and types of scale, Accuracy & Errors 	2 hrs.
2	Linear Measurements	<ul style="list-style-type: none"> • Measurement of distance with chain, tape, EDM, GPS, etc., measurement on sloping ground, obstacles, Errors in measurements • Selection of survey station. • Chain line, Offset, oblique offset, tie line, check lines, ranging. • Field book plotting. 	4 hrs.
	Measurements of Angles	<ul style="list-style-type: none"> • Various parts of Compass, Types, • Errors affecting angular measurements • Types of the traverse, Orientation of traverse 	4 hrs.

HUCS 101: COMMUNICATION SKILLS

Syllabus: 15 weeks (2 hours/week) Total Teaching hours: 30 Hrs.

COURSE OBJECTIVES:

- Develop the second language learners' ability to enhance and demonstrate skills
- Acquire English language skills to further their studies at advanced levels
- Become more confident and active participants in all aspects of their undergraduate programs

COURSE OUTCOME:

- At the end of the course, students will be able to -
- Demonstrate understanding of the English Language
 - Interpret the basic structure, grammar, vocabulary, and speech construction
 - Develop an Understanding of Keywords in Architecture
 - Build art of presentation in basic writing and public speaking with a focus on meaning, interpretation, accent, rhythm, etc. of the keywords in Architecture.
 - Adapt skills of listening, reading, understanding, speaking, writing & translation in English
- The students should be able to: Have confidence in their ability to read, comprehend, organise and retain written information; Write grammatically correct sentences for various forms of written communication to express themselves

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

The students should be able to: Have confidence in their ability to read, comprehend, organise and retain written information; Write grammatically correct sentences for various forms of written communication to express themselves

COURSE OVERVIEW:

To provide an adequate mastery of technical and communicative English Language training primarily, reading and writing skills, secondarily listening and speaking skills.

COURSE CONTENTS:

SR. NO.	SYLLABUS: TOPIC	SUBTOPIC	TEACHING HOURS:
1	UNIT I	"Communication: nature, meaning, definition, verbal and non-verbal communication, barriers to communication	6 hrs.
2	UNIT II	Basic language skills: grammar and usage, parts of speech, tenses, subject, and verb agreement, prepositions, articles	6 hrs.
3	UNIT III	Basic language skills: types of sentences, direct - indirect, active and passive voice, phrases and clauses	6 hrs.
4	UNIT IV	Business correspondence: business letter, parts and layouts of business resume and job application, email writing, e-mail etiquettes.	6 hrs.
5	UNIT V	report writing: the importance of the report, types of report, the structure of a report	6 hrs.
	PRACTICAL:	self-introduction, reading skills, and listening skills, oral presentation, linguistics and phonetics, JAM (just a minute), group discussion, role plays	

NOTE: A Student Has to Produce a Presentation by The End of The Term and proper presentations as it is part of the architecture for juries and presentations

ARCH 110: STUDY TOUR I

I) STUDY TOUR /FIELD STUDIO

Syllabus: 1weeks (6 hours/week) Total Teaching hours: 30 Hr.

COURSE OBJECTIVE:

To analyze various art forms, and understand the techniques involved in creative thinking.

COURSE OUTCOME :

At the end of the course, students will be able to

- Students will get an understanding of the “synthesis of learning from various courses” by observing; registering & mapping built buildings.
- Programme outcome will be extremely valuable in creating a knowledge base on the architecture field not only in India but in nearby countries as well.
- Production of Accurate and precise drawings of many a monument, institutions, and settlements in India, which become a basis for future research.

Provides knowledge on the traditional art form, innovations in and influences on architecture and thinking process in design;

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

different skills for creative thinking, understanding various art forms and appreciating art and architecture. a paper presentation and a summer case study

COURSE OVERVIEW:

Students will develop the skills & understanding of measure drawing.

COURSE CONTENTS:

SR. NO. SYLLABUS: TOPIC SUBTOPIC

TEACHING HOURS:

The STUDY TOUR (SBP) at the Institute of Architecture is a unique contribution to Architectural education. Initially called measure drawings, it is intended to take the students out into the field to get a first-hand experience of traditionally built environments. This subject recognizes the value of traditional architecture as well as the importance of field experiences and travel in the learning of architecture. The students are encouraged to learn about not only the architectural form but also related components of architectural relevance.

- Student and faculty members stay at the selected Village for 8 to 15 days.
- Students will get a comprehensive awareness of that village.
- Students will measure the built environment in terms of a cluster of houses, individual houses, and building elements of that house.
- Students will also document the social, cultural, and environmental aspects of that village.
- Students came back to the institute and make the final Drawings and reports within the remaining days.

The topic of the project is to be displayed on the Institute Notice Board fifteen days in advance OF the commencement of the classes

NOTE: Evaluation is to be done through viva voce by an external examiner appointed by the university at Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva-voice

Evaluation: Stages: Proposal and on final submission of the paper /DOCUMENTATION of places visited Students contribute to the topic/area is of critical importance.

detailed out as per the academic calendar

a paper presentation on any subject of interest in the core or elective subjects.

The student needs to identify an area for research and in consultation with a guide propose first. On approval, this is to be developed through the summer and culminate as a research paper. Requirements (from students): Proposal, reviews, final presentation and paper.

a summer case study where the student has to select a built building by one of the architects and have a live document the building and analyse the building and a word of the concept according to the architect.

COURSE CONTENTS:

SR. NO. SYLLABUS: TOPIC SUBTOPIC

TEACHING G HOURS:

This course provides an opportunity for students to experience a working environment in an architecture firm in which to observe and apply their knowledge and skills for the degree. Projects will be negotiated between the School and the host organisation, involving students in a variety of design stages from preliminary design, design development, documentation, and presentation to a client. Students may also be involved in meetings, clerical work and administration to gain insight into the day-to-day functioning of a business.

The course will be offered to students based on academic merit through a competitive application and interview process. Students must complete the course to the satisfaction of the host organisation and academic supervisor

GUIDELINES

The place of the internship is to be finalised and displayed on the Institute Notice Board fifteen days in advance of the commencement of the vacation

Internship: During the internship phase (last seven weeks of the program), students will be working at their internship placement around 28 hours a week, from Mondays to Thursdays

NOTE: Evaluation is to be done through viva voce by an external examiner appointed by the university at Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva-voice

Evaluation: Stages: Proposal and on final submission of the paper /DOCUMENTATION of places visited Students contribute to the topic/area is of critical importance.

detailed out as per the academic calendar core or elective subjects. employment. This will be up for 2 weeks beginning It is the responsibility of the student to display and remove it promptly.

COURSE OUTCOME:

At the end of the course, students will be able to
 -overall nurturing of the student with issues in practice and field outside
 better grooming than just books and theories.

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

better grooming than just books and theories.

COURSE OVERVIEW:

The following is a representative list of Institute projects: Seminars, Tutorials/ additional classes for any course, Guest Lectures, Workshops, Providing knowledge to support students being sensitive design;

COURSE CONTENTS:

SR. NO.	SYLLABUS: TOPIC	SUBTOPIC	TEACHING G HOURS:
1		The creative electives provide an opportunity to express talents that are different from architecture but related to imagination, visualization & creation. They offer hands-on experience of unique ingenuity & workmanship. The essence of a creative domain can be achieved by exploring different materials, techniques, and processes; developing creative products; finishing & presenting the product for the concepts evolved. The outcome will be through portfolio & presentations.	
		<ul style="list-style-type: none"> As Per Pool Electives Choices Stage I odd semester pool 	

GUIDELINES

The topic of the project is to be displayed on the Institute Notice Board fifteen days in advance OF the commencement of the classes

NOTE: Evaluation is to be done through viva voce, Portfolios after the university exam shall be retained at the Institute level for the viva-voice

Pottery

Students will understand different types and forms of pots; Also the sense of the different scales of pots will be developed.
 Understand the discipline of the workspace and its instruments of it; Different materials of pot making will be explored; the Different technology of the pottery will be explored; Understanding of firing in the kiln for baking of the pots

L - THEORY, S- STUDIO, T- TUTORIAL, C - CREDIT, HRS- HOURS, MST - MIDTERM TEST, A, MSI - AVERAGE OF MIDTERM, ESUE - END SEMESTER UNIVERSITY EXAMINATION, IA - INTERNAL ASSESSMENT PROGRESSIVE, SS- FOLIO FINAL Sessional (INTERNAL), EV - EXTERNAL VIVA VOICE, RVW - INTERMEDIATE REVIEW

Sketching and rendering

Freehand line sketching and drawing of natural and manmade. Study of shades and shadows, Sketching of Historic or new built-up structures of Architectural importance using different mediums. Understanding of human proportion about compositions; freehand sketching of volumes, spaces & human figures. Indoor objects - still Life – Furniture, Equipment - Understanding Depth, light, Shade, Shadow Etc., Outdoor sketching: Natural Forms/ Built Forms, Understanding variety in Forms. Sketching Human Form: Anatomy and Expressions - Graphical Representations. Colour: Freehand rendering of Landscapes & builtscapes including human figures; Exercises; Application of Color in Architectural rendering; Relation between colour & texture. Rendering techniques: Introduction to surfaces and media, observation, recording and basic representation techniques in different media through drawing pencil, pen, brush, charcoal, crayons etc. general approach to rendering, Entourage, Treatment of sky, clouds, landscape elements, human figures, foreground and surroundings, shadow projections in renderings. Graphic skills and Presentation Techniques: Page layout and Composition grids; Illustration techniques; Portfolio design and formats; Digital techniques in graphics

Caricature

Students will learn about the history of caricature. Students will understand the techniques of making caricatures. Students will develop analytical skills and different techniques. Brief History of caricatures, Uses and applications of caricatures in the design field, Caricatures of objects, animals, Caricature of person

4. MOOC

COURSE OBJECTIVE:

overall nurturing of the student with issues in practice and field outside

COURSE OVERVIEW:

The following is a representative list of what may :
Tutorials/ additional classes for any course on online mode of platforms, Provides knowledge to support student being sensitive to design;
• a paper presentation

COURSE OUTCOME:

EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

better grooming than just books and theories.

COURSE CONTENTS:

SR. NO. SYLLABUS: TOPIC SUBTOPIC

TEACHING G HOURS:

- The creative MOOC provide an opportunity to access a different form of architecture related to imagination, visualization & creation. They offer the experience of unique ingenuity, theory or workmanship. The essence of the creative domain can be achieved by exploring different materials, techniques, and processes; developing creative products/theories; finishing & presenting the product for the concepts evolved. The outcome will be through portfolio & presentations. Where these workshops or MOOCs help them explore the different topics relevant to individual interests and in the palette of choices for the semester
