L - THEORY; S- STUDIO , T-TUTORIAL- C - CREDIT-HRS: HOURS : MST -MIDTERM TEST , A.MST - AVERAGE OF MIDTERM ESUE - END SEMESTER UNIVERSITY EXAMINATION: IA - INTERNAL ASSESSMENT PROGRESSIVE;SS- FOLIO FINAL Sessional (INTERNAL) , EV - EXTERNAL VIVA VOICE,RVW - INTERMEDIATE REVIEW

**COURSE OVERVIEW:**

This course is intended to provide skills for designing a single use, small span and single-storey buildings.

**OBJECTIVES OF THE COURSE:**

To develop abilities in design in the context of user requirements.

**EXPECTED SKILLS / KNOWLEDGE the TRANSFERRED:**

To enhance the understanding of the complexities of architectural design for residential needs and develop creative design solutions for good living environments. Use of standards, handling of space, and application of knowledge gained from other subjects in design.

FOCUS: Institutional & Building Systems, Services.

- The student will learn and develop design vocabulary which would define the institutional character through its organizing principles,
- The student will understand construction techniques and materials.
- The student will achieve the capacity of Site analysis, Landscape systems, Abstract Models, Part detail constructional models, design development methods that clarify part-whole relationships.

**COURSE CONTENTS:**

- Institutional scale
- The institutional theme, image, concept
- Organization and disposition of spaces
- The character of the institutional building
- The density of user groups and circulation patterns
- The studio also emphasizes on the resolution of appropriate systems, such as spatial, structural and building along with programmed and un-programmed spaces
- **Theme & focus of design:** Study, analysis & utilization of Non-Conventional Systems (alternative building technologies). Understanding, exploration & development of design programme, concepts & detailed design with a focus on Stabilized Mud Blocks, Bamboo, Ferro-cement, etc. in urban &/or rural context.
- **Basic Components:** Behavioral Science; Functionality; Building Materials; Theory of Design; Form Development; Tectonic decisions: Structures, Building Materials, Services; Site Planning; Building Control Regulations; Inclusive Design; Design Communication.
- **Gateways & Thresholds:** Importance, Exploring & Understanding the essence; detailing process; User analysis; Elements; functionality, aesthetics; Materials. This Minor Exercise will be represented through conceptual development (sketches, physical & digital models).
- **Design Analysis:** Exploration & analysis of iconic Eco-sensitive Architecture; Understanding design philosophy & process; Learning from design quality, Literature/book reviews; Architectural critiques.
- **Design Exercise:** Building Design. The complexity of design: Site planning involving multiple buildings; Detailing of anyone building with alternative technology. Typology: Co-operative Societies, Vocational Training Centers, Rural Residential Schools, Bus Stations, Veterinary Centers, Temporary Shelters, Labour Camps, Ayurveda Centers, Naturopathy Centers, SOS Villages, Horticultural Centers, Ashram etc. Site extent: Flat site up to 8000 m2.

**GUIDELINES**

One Major And Minor tasks/ exercises are to be set from the entire syllabus

The topic of the project is to be displayed on Institute Notice Board fifteen days in advance OF commencement of the classes

**NOTE :**

- Necessary theoretical inputs to be given highlighting the norms and design issues. The topics not covered as design problems will have to be covered by the Studio faculty members through lecture/slideshow sessions and site visits.

- At least one major exercises and one minor design with two-time problems should be given.
- The final submission shall necessarily include a model for at least one of the two main problems.
- In end exam which is a viva-voce, the students have to present the entire semester work for assessment.
- Evaluation is to be done through viva voce by an external examiner appointed by the university at Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva- voice.

## ARCH 502: SITE PLANNING

COURSE	COURSE AREA	COURSE TYPOLOGY	NAME OF THE COURSE	TEACHING SCHEME					EVALUATION							TOTAL MARKS	EXAM DURATION (HRS)			
				L	T	S	CREDIT	TOTAL CLASS HRS	THEORY					STUDIO						
									MST 1 10%	MST 2 10%	A. MST 10%	SS 50% OR 30%	ESUE 40%	TOTAL	IA 10% OR 60%			EV 10% OR 40%	TOTAL	
ARCH 502	AR	THEORY CUM STUDIO	SITE PLANNING	1		1	2	2								60	40	100	100	

L - THEORY; S- STUDIO , T -TUTORIAL; C - CREDIT-HRS: HOURS ; MST - MIDTERM TEST , A.MST - AVERAGE OF MIDTERM , ESUE - END SEMESTER UNIVERSITY EXAMINATION; IA - INTERNAL ASSESSMENT PROGRESSIVE; SS- FOLIO FINAL Sessional (INTERNAL) , EV - EXTERNAL VIVA VOICE,RVW - INTERMEDIATE REVIEW

### COURSE OVERVIEW:

This course introduces students to site planning and relates it to design and planning of built environments.

### OBJECTIVES OF THE COURSE:

To expose the students to the various techniques of site analysis and planning,  
 To teach the importance of the site and its content in architectural creations, to orient the students towards several influencing factors which govern the sitting of building or group of buildings in a given site  
 to introduce various techniques of site analysis through exercises and case studies , the methodology of preparing a site analysis diagram, which serves as a prelude to any architectural creation through exercises

### EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

To develop an understanding of the importance of site conditions for the creation of good architectural solutions and focus on the site as a fundamental component of building design. examines the interrelationship of intended site use with the environment and also topography, vegetation and landscape, climate, geography, as well as theoretical aspects of site development. conceptual understanding of landscape design and site planning principles. skills in integrating landscape design with built environments

- The contextual importance on-site analysis can be understood based on the various site factor with respect to the study area.
- Various scientific and analytic site analysis techniques are understood.
- A methodological approach for the preparation of master plans for small scale and large scale projects can be understood.

### COURSE CONTENTS:

Philosophical and design issues related to site development – sitting of buildings, spatial and contextual relationships of built and outdoor space and circulation, site and its relationship to surroundings. Importance of climate and social factors in the development of the site. The process of design development. Identifying functional requirements of the site. Development of site by mutual exploitation of forms and use of grading principles.

- Introduction to Site Planning:
  - site drawings
- Introduction To Site Analysis
  - site context
- Design Of Landforms In A Site:
  - Site Planning Principles And Techniques:
    - Site survey and appraisal
    - Contemporary concepts and concerns:

### GUIDELINES

One Major And Minor tasks/ exercises are to be set from the entire syllabus  
 The topic of the project is to be displayed on Institute Notice Board fifteen days in advance OF commencement of the classes

### NOTE :

- Necessary theoretical inputs to be given highlighting the norms and design issues. The topics not covered as design problems will have to be covered by the Studio faculty members through lecture/slideshow sessions and site visits.
- At least one major exercises and one minor design with two-time problems should be given.
- The final submission shall necessarily include a model for at least one of the two main problems.
- In end exam which is a viva-voce, the students have to present the entire semester work for

assessment.

- Evaluation is to be done through viva voce by an external examiner appointed by the university at Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva- voce.

### Assignments

Studio exercise emphasizing the relationship between built form and outdoor areas, and site planning issues. Landscape design of a neighbourhood open space (area of 2000 to 3000 sq. metres)

L - THEORY; S- STUDIO , T -TUTORIAL; C - CREDIT-HRS: HOURS ; MST - MIDTERM TEST , A.MST - AVERAGE OF MIDTERM , ESUE - END SEMESTER UNIVERSITY EXAMINATION; IA - INTERNAL ASSESSMENT PROGRESSIVE;SS- FOLIO FINAL Sessional (INTERNAL) , EV - EXTERNAL VIVA VOICE,RVW - INTERMEDIATE REVIEW

### COURSE OVERVIEW:

The coursework deals with principles, methods and construction practices of structural steelwork. The outcome of this course is the ability to SPECIFY building materials as per the demands of Design Program.

### OBJECTIVES OF THE COURSE:

To introduce and expose students to various aspects involving the use of steel for construction activity of buildings and structures.

### EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

To understand the techniques of constructing Steel And Pre Fab, staircase and partitions using different materials

### FOCUS : STEEL

- The student will understand long span building construction system
- Students will develop the understanding of different types of Finishes
- The student will learn the relationship between construction technique and architecture vocabulary.

### COURSE CONTENTS:

- Long span structures - flat slab, beam and ribbed slab, waffle slab, vault, dome, shell structure, steel trusses, girder, portal frame, folded plate structure, PEB

### STEEL

#### Introduction:

#### Steel Work Connections:

**Metal Building components:** windows, doors, stairs, collapsible gates, rolling shutters, railings, BIS Codes.

**Steel Members:** Columns and stanchions, stanchions or column bases, beam and girders, column and beam connections plate girders, lattice or Warren girder.

**Frame & Roof systems:** Steel stanchions, girders, trusses: Characteristics, types, components, selection, applications, structural sizing, fabrication & erection. Castellated Beam, Portal frames, Steel connections. Analysis & Design of simple trusses.

**Steel Roof Trusses:** Steel trusses, types for various spans, tubular steel roofs, monitor roof, north light roof truss, details of steel –roof trusses.

**Curtain wall:** Characteristics, types, components, selection, applications, structural sizing, connections. Lantern light, dome light, structural steel practice and drawings as per IS Code. Portal frame, Geodesic principles, cable net and tensile structures.

**Advanced Systems:** Space frames; Pre-engineered buildings, fire protection. Overview: tall structures,

- Different types of Interior, Exterior, Vertical & Horizontal Finishes i.e.Plaster, Paint, Texture, Paving, Cladding etc.

### GUIDELINES FOR QUESTION PAPER SETTING

All Theory cum studio-based courses

- Part- A (5 NOS X 6 MARKS = 30 MARKS) Answer all questions
- Part- B (2 NOS X15 MARKS = 30MARKS)
- (Either or type)

(Since they are a mix of drawing and theory content, all

Part-A questions relate theory

Part-B questions are drawing based.

It is not possible for a candidate to answer more than 4 drawing questions in a three-hour duration)to theory and all

- Students will be required to attempt 5+2 questions from the Eight questions, are to be set from entire syllabus. where 2 questions may be short answer , 2 questions may be short answer type with 2- 3 subheads and 2, short with 4 subheads answer type and 2 essay type questions which is compulsory.

- Students should attempt total 7 Questions including the compulsory question.

- Question paper is to be set covering the entire syllabus.

Note: This is a studio subject and students should be made to prepare construction drawings as studio exercises along with the theoretical inputs. The studio works large span structures. should be supplemented with appropriate site visits.

## ARCH 504 WORKING DRAWING

COURSE	COURSE AREA	COURSE TYPOLOGY	NAME OF THE COURSE	TEACHING SCHEME					EVALUATION							TOTAL MARKS	EXAM DURATION (HRS)			
				L	T	S	CREDIT	TOTAL CLASS HRS	THEORY					STUDIO						
									MST 1 10%	MST 2 10%	A. MST 10%	SS 50% OR 30%	ESUE 40%	TOT AL	IA 10% OR 60%			EV 10% OR 40%	TOTAL	
ARCH 504	SK	THEORY	WORKING DRAWING			2	2	2								90	60	150	150	

L - THEORY; S- STUDIO , T -TUTORIAL; C - CREDIT-HRS: HOURS; MST - MIDTERM TEST , A.MST - AVERAGE OF MIDTERM , ESUE - END SEMESTER UNIVERSITY EXAMINATION: IA - INTERNAL ASSESSMENT PROGRESSIVE;SS- FOLIO FINAL Sessional (INTERNAL) , EV - EXTERNAL VIVA VOICE,RVW - INTERMEDIATE REVIEW

### COURSE OVERVIEW:

The focus of the course is to impart skills related to the preparation of drawings meant for construction work on the site and to improve the students' ability to detail.

### OBJECTIVES OF THE COURSE:

To impart training in the preparation of working drawings for buildings with specific reference to the code of practice as per IS Code No. 962 of 1969 and incorporating specifications as complementary to the working drawings.

To sensitize the students in preparing finer design details required for buildings.

### EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

To prepare working drawings for a project and resolve complex aspects in the buildings with appropriate materials and design details.

### COURSE CONTENTS:

- Overview: Working Drawing, Estimation & Specifications; Liaison drawings; Standards, guidelines for execution of works, Units of measurements; Writing specifications; Methods of estimation; Rate analysis of relevant items. Preparation of working drawings: Suitable scales of drawings, methods of giving dimensions: on plans, sections, elevations and other standards.
- Site development details; Paving, Site drainage, compound wall, gate, etc. Centre line drawing, Excavation drawing, Foundation details & Floor Plans: Roof Plan including roof drainage, Stair room plan. Preparation of Plans Building marking plan, centerline plan, foundation plan, column centerlines drawings, floor plans, terrace floor plan.
- Elevation and Sections, Wall sections; Kitchen & Toilet details; Sanitary & plumbing; Rainwater harvesting; water tank & septic tank as per calculations. Detailing of architectural elements. Door & window: Details, installation & hardware. Railing details. Wall finishes & colour scheme.
- Staircase & its components.
- Electrical layout with furniture; Circuit drawing; Conduit drawing; Voice & data; Fixture mounting heights etc.
- Overview: Working Drawing, Estimation & Specifications; Liaison drawings; Standards, guidelines for execution of works, Units of measurements; Writing specifications; Methods of estimation; Rate analysis of relevant items. Preparation of working drawings: Suitable scales of drawings, methods of giving dimensions: on plans, sections, elevations and other standards.

### GUIDELINES

One Major And Minor tasks/ exercises are to be set from the entire syllabus

The topic of the project is to be displayed on Institute Notice Board fifteen days in advance OF commencement of the classes

### NOTE :

Students shall prepare at least two working drawing sets, one for a small residence and one for a large building than the other All units to include drawings & details; estimation & specifications. of one-storied building

Evaluation is to be done through viva voce by an external examiner appointed by the university at Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva-voce.

**COURSE OVERVIEW:**

History of Architecture to be studied as the development of building forms in response to social, religious, aesthetic and environmental factors. The study should focus on the three-dimensional forms, plan forms, façade organization, a structural solution, construction methods and ornamentation. The study should focus on the general trends and not on specific e.g. of buildings.

**OBJECTIVES OF THE COURSE:**

To expose the students to a wide spectrum of architectural styles ranging from pre-historic to modern times.

To explain the students the evolution of architecture in relation to time with special emphasis on social, religious and environmental factors.

To make the students understand the developments in the construction technology in different periods.

**EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:**

- 1) Acquire knowledge to identify the common characteristics among the monuments of a particular style.
- 2) Acquire graphic skills to present a building, analyze its elements and explain the composition.
- 3) Acquire knowledge of good practices of architecture in the past.

FOCUS: Modern, Post Modern & Contemporary Architecture

- The student will learn about the beginning and the causes of the Modern and subsequent movements
- The student will learn about the context through which ideas developed as a linear consequence of events
- The student will become aware of the theories developed in the latter part of the 20th century

**COURSE CONTENTS:**

- To study Evolution of form and growth of architectural vocabulary from Neo-Classical to Contemporary architecture.
- Artistic Movements like Bauhaus, De Stijl, Art Nouveau, CIAM etc. Modernism in Europe & the U.S. (Louis Sullivan, Frank Lloyd Wright, Mies Van Der Rohe, Le Corbusier etc.). Works of architects like Alvar Aalto, Eero Saarinen, Louis Kahn, Robert Venturi
- Post-Modernism - Philip Johnson, Charles Moore, Michael Graves, Richard Meier, James Stirling and others. De-constructivism and Post- Structuralism

**GUIDELINES FOR QUESTION PAPER SETTING**

All Theory Courses

- Part- A (5 NOS X 2 MARKS = 10 MARKS) Answer all questions
- Part- B (2 NOS X15 MARKS = 30 MARKS)  
(Either or type)

- Students will be required to attempt five questions from the Eight questions, are to be set from entire syllabus. where 2 questions may be short answer type which is compulsory with 2- 3 subheads and 2, short with 4 subheads answer type and 4 essay type questions.

- Students should attempt total Seven Questions including the compulsory question.

- Question paper is to be set covering the entire syllabus.

**NOTE:-**Emphasis should be laid on understating of building evolution and form. The continuous evaluation shall be made of students work based on various models, assignments and sketching

### COURSE OVERVIEW:

This course introduces students to landscape design, relates it to design and planning of built environments. It provides an overview of the development of landscape design, site studies, plant studies and application of the knowledge at various levels of design.

### OBJECTIVES OF THE COURSE:

Understanding environment, human interventions and the impacts on it and knowledge about various measures of protecting it. Exposure to various concepts, ideas and techniques prevalent in landscape architecture.

To expose the students to the various techniques of site analysis and planning,

### EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

To develop an understanding of the importance of site conditions for the creation of good architectural solutions and focus on the site as a fundamental component of building design. examines the interrelationship of intended site use with the environment and also topography, vegetation and landscape, climate, geography, as well as theoretical aspects of site development. conceptual understanding of landscape design and site planning principles. skills in integrating landscape design with built environments

### COURSE CONTENTS:

- Introduction to Landscape Architecture:
- History of Landscape Architecture:
- Elements in Landscape Design:
- Hardscape & Softscapes:
- Plants and Design:
- Landscape Services & Sustainability
- Urban Landscape:
- Contemporary concepts and concerns
  - Environmental impact assessment: methodologies and techniques , Environmental legislation: planning techniques: evaluation techniques:

### GUIDELINES FOR QUESTION PAPER SETTING

All Theory Courses

- Part- A (5 NOS X 2 MARKS = 10 MARKS) Answer all questions
- Part- B (2 NOS X15 MARKS = 30 MARKS)
- (Either or type)
  - Students will be required to attempt five questions from the Eight questions, are to be set from entire syllabus. where 2 questions may be short answer type which is compulsory with 2- 3 subheads and 2, short with 4 subheads answer type and 4 essay type questions.
  - Students should attempt total Seven Questions including the compulsory question.
  - Question paper is to be set covering the entire syllabus.

### Assignments

Simple exercises in using plants and landscape elements, Studio exercise emphasizing the relationship between built form and outdoor areas, and site planning issues. Landscape design of a neighbourhood open space (area of 2000 to 3000 sq. metres)

### COURSE OVERVIEW:

This course focuses on the structural design of different elements of building in RCC.

### OBJECTIVES OF THE COURSE:

To develop the structural design skills in RCC elements

### EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

Ability to analyze the standard members in structures IN R.C.C.

### COURSE CONTENTS:

- Introduction to RCC design, Design Philosophies:
- Situations where doubly reinforced beams
- T-beams: Slabs: Columns Design of the staircase
- Design of lintels and cantilever beams and slabs using limit state method only
- Design of RCC Isolated footings for columns (Square and Rectangle) - working stress method only.
- Introduction, to prestressed concrete, Pretension & Post-tensioning methods, Problems of beams.

### GUIDELINES FOR QUESTION PAPER SETTING

All Theory Courses

- Part- A (5 NOS X 2 MARKS = 10 MARKS) Answer all questions
- Part- B (2 NOS X15 MARKS = 30 MARKS)
- (Either or type)

- Students will be required to attempt five questions from the Eight questions, are to be set from entire syllabus. where 2 questions may be short answer type which is compulsory with 2- 3 subheads and 2, short with 4 subheads answer type and 4 essay type questions.
- Students should attempt total Seven Questions including the compulsory question.
- Question paper is to be set covering the entire syllabus.

**NOTE:-**Emphasis should be laid on understating of building structures. The continuous evaluation shall be made of students work based on various models, assignments and sketching

**COURSE OVERVIEW:**

To explain the different techniques and instruments used in a survey of land tracts

**OBJECTIVES OF THE COURSE:**

To explain the techniques and instruments used in a survey of land tracts

**EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:**

Surveying skills and related theory.

**COURSE CONTENTS:**

- Introduction
- Chain Surveying: errors and corrections, the composition of Areas.
- Compass Surveying:
- Plane Table Survey:
- Levelling
- Theodolite

**GUIDELINES FOR QUESTION PAPER SETTING**

All Theory Courses

- Part- A (5 NOS X 2 MARKS = 10 MARKS) Answer all questions
- Part- B (2 NOS X15 MARKS = 30 MARKS)
- (Either or type)

- Students will be required to attempt five questions from the Eight questions, are to be set from entire syllabus. where 2 questions may be short answer type which is compulsory with 2- 3 subheads and 2, short with 4 subheads answer type and 4 essay type questions.
- Students should attempt total Seven Questions including the compulsory question.
- Question paper is to be set covering the entire syllabus.

**Note:**

Site Studies – Plot, site, land and regions, size and shape of the site, Analysis of accessibility, Topography, Climate, landforms, Surface Drainage, Soil, Water, Vegetation, Ecology and Visual aspects.

## ARCH 519: ELECTIVE - IV

COURSE	COURSE AREA	COURSE TYPOLOGY	NAME OF THE COURSE	TEACHING SCHEME					EVALUATION							TOTAL MARKS	EXAM DURATION (HRS)			
				L	T	S	CREDIT	TOTAL CLASS HRS	THEORY					STUDIO						
									MST 1 10%	MST 2 10%	A. MST 10%	SS 50% OR 30%	ESUE 40%	TOT AL	IA 10% OR 60%			EV 10% OR 40%	TOTAL	
ARCH 519	SU	STUDIO	ELECTIVE - IV ( POOL I)			1	1	1								50		50	50	

L - THEORY; S- STUDIO , T-TUTORIAL; C - CREDIT-HRS: HOURS : MST - MIDTERM TEST , A.MST - AVERAGE OF MIDTERM , ESUE - END SEMESTER UNIVERSITY EXAMINATION: IA - INTERNAL ASSESSMENT PROGRESSIVE;SS- FOLIO FINAL Sessional (INTERNAL) , EV - EXTERNAL VIVA VOICE,RVW - INTERMEDIATE REVIEW

### COURSE OVERVIEW:

The following is a representative list of what may constitute Institute projects:  
 Seminars, Tutorials/ additional classes for any course, Guest Lectures, putting up Exhibitions, Workshops, participating in Architectural Competitions or conducting Site Visits or Study Tours. Provides knowledge on to support student being sensitive design; a paper presentation and a summer case study

### OBJECTIVES OF THE COURSE:

overall nurturing of the student with issues in practice and field outside

### EXPECTED SKILLS / KNOWLEDGE TRANSFERRED:

better grooming than just books and theories.

### COURSE CONTENTS:

The creative electives provide an opportunity to express talents which are different from architecture but related to imagination, visualization & creation. They offer hands-on experience of unique ingenuity & workmanship. The essence of creative domain can be achieved by exploring different materials, techniques, processes; developing creative products; finishing & presenting the product for the concepts evolved. Outcome will be through portfolio & presentations.

As Per Pool Electives Choices Stage I odd semester pool

### GUIDELINES

One Major And Minor tasks/ exercises are to be set from the entire syllabus  
 The topic of the project is to be displayed on Institute Notice Board fifteen days in advance OF commencement of the classes

### NOTE :

Evaluation is to be done through viva voce by an external examiner appointed by the university at Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva - voice
